## TAXEXPRESS 360

*Customized, Real-Time Automated Tax Processing Solutions  
from the Pioneer and Leader in Data Imaging and Capture*

### **The Scan-Optics TaxExpress 360 Integrated Solution**

Scan-Optics TaxExpress 360 is the state-of-the-art suite of TaxExpress software, professional services, enterprise-class scanner technology and dedicated maintenance services designed to deliver real-time, automated tax processing solutions to meet the ever-increasing performance demands of revenue agencies. Document Process Outsourcing and Business Continuity Services further expand your options. Scan-Optics strategically partners with complementary solutions providers to create the best image capture, recognition and archiving solutions and services, customized to your requirements.

### **The Software That Delivers Speed, Accuracy and Productivity**

Designed specifically for the needs of tax processing, the TaxExpress Solutions software at the heart of our modular solutions provides:

- **Reliable intelligent data capture** – up to 1,200 check/tax coupon images per minute
- **Easy-to-use graphical interface** – provides the ability to change business rules on the fly
- **Same-day check deposit** – Check 21/ACH deposit flexibility for improved funds availability
- **Unbeatable reliability and productivity** – improve the speed and accuracy of accounts receivable remittance and check processing
- **Real-time reporting tools** – access to up-to-the-minute, daily and historical reports for better management control
- **Cost savings across the board** – reduce deposit-related bank service fees by over 50%, increase productivity with a smaller staff, and lower overall operational costs

### **The Scan-Optics Difference – Experience and Versatility**

Scan-Optics' excellent track record in tax processing includes service to the federal government, Revenue Canada and 15 state governments. Our experience gives you the benefits of:

- Specialized **knowledge** of the full range of tax types
- An **emphasis** on meeting peak-processing demands
- A **commitment** to delivering customized and complete solutions
- A **focus** on continuous improvement and Voice of the Customer through Lean Six Sigma disciplines
